Abortion, the easiest way to fix one's mistakes. I mean, if one is going to screw around and accidentally get knocked up, why should they have to be responsible for the outcome of messing around. Why not just murder the unborn child. That is what goes on daily, slaughtering of young, innocent children, that if born, would easily find a home. What did they [the unborn child] do wrong? Oh nothing, it's just that the mother and/or father are just so lazy and irresponsible that they would rather see their child be butchered than have to change it's diaper or feed it. Society today does not respect life and therefore accepts the murdering of unborn children.

A major factor that is missing in society in today's world are moral values. If people actually had morals, then abortion might not occur. No matter what anyone argues, abortion is murder, plain and simple. How could one deny that when a doctor grabs his forceps and crushes a child's skull and sucks out what was once a brain, how could they say that is not murder, how could someone get away with doing this. Then again people ask that same question about OJ.

There are many abortion-slaughter techniques that are used today. Examples are the Dilatation and Curettage (D&C) where a loop shaped steel knife is inserted and the child is cut into pieces, also there is the Dilatation and Evacuation (D&E) where the doctor uses forceps with sharp metal jaws and tears the child apart, piece by piece. Usually the head is hardened to bone and must be compressed or crushed in order to get it out. Another highly controversial technique that is getting a lot of publicity nowadays is the partial birth method. This procedure is performed in the second and third trimesters of pregnancy or between 20 to 32 weeks,

sometimes later. Now according to Abortion: Some medical facts, a book printed by the National Right to Life, the partial birth technique is performed like this: "Guided by ultrasound, the abortionist reaches into the uterus, grabs the unborn baby's leg with forceps, and pulls the baby into the birth canal, except for the head, which is deliberately kept just inside the womb. (At this point in a partial -birth abortion, the baby is alive.) Then the abortionist jams scissors into the back of the baby's skull and spreads the tips of the scissors apart to enlarge the wound. After removing the scissors, a suction catheter is inserted into the skull and the baby's brains are sucked out. The collapsed head is then removed from the uterus." Now I don't see a difference between the partial-birth method and say me going up to someone and stabbing them over and over again. The only difference is the outcome, were I would be charged with murder for committing such a crime , but the "doctors" that perform the 1.5 million murders a year get paid and some even praised.

Hopefully people will wake up and see that abortion truly is murder. The opposition usually contests that women have the right to terminate their pregnancy whenever they want. Now I was taught that one could not have a right that conflicts with the rights of others, therefore the claim that women have such a right is irrelevant. Most uninformed people think that the majority of abortions are performed because the woman's life is in danger, well that is not fact. Fact is that 93% of all induced abortions are done for elective, nonmedical reasons. To make it simple, they are just irresponsible, they are murders and will have to live with that for the rest of their lives.
