

The communication style of man and woman

There are two genders----man and woman in the world. Though these two gender live in the same culture, there are many differences between them, include communication style.

The communication means that speech in life. If someone let you listen a dialogue

that the same sound. I think you can discriminate from the speech content and style,

who is man, who is woman. both man and women like boasting. but the express

way is different. for example, a man want to boast himself how [^]^[^]., he will say

directly. but woman want to boast herself how beautifully, she won[^]Øt express

directly like man do. she will say how many man like her, how many man date

her[^]^[^].that means she is a pretty woman. In addition, if woman want show her

money, she won[^]Øt to say directly how much money she had, she will change topic

of conversation, like[^]^how much her clothes, her car and her jewelry.

Another way in which man[^]Øs and woman[^]Øs communication differ is body[^]Ølanguage.

All people have known that woman like cry. why? woman likes use body-language to express

her mood. because she can[^]Øt express directly. If man felt unhappy or happy, he will say

directly. but woman won[^]Øt be. She uses cry to display her bad mo ., so sometimes, you can[^]Øt know what[^]Øs reason let she cry.
