

Views of Gangs

BY:Jens Shriver

Since the start of the 90's violent gangs have been increasing. Most gangs are made out of troublesome teens but there are also plenty of adults in gangs. Alot of the problem is that these teens have access to illegal firearms. Some gang members were interviewed. One said he felt kind of guilty because he accidentally killed someone in a drive-by. Most people look on gangs as the bad side of the community. Another gang member stated that he and his friends joined a gang for the protection. There are many types of gangs Bloods , Crypts , United Bamboo and the KKK to say a few. Each usually comes with there own symbol , color , dress style or hand signal. Then there are branches of the gangs. It usually depends on were you live to what gang is in your area.

Also many gangs are associated with drugs from smoking cigarettes to sniffing cocaine. There are many gangs who buy, sell and even make drugs.

In many gangs to join you have to be jumped in meaning about 30 guys from the gang come and beat the crap out of you. Or they give you some kind of test like to kill some rival gang member or rob a bank. Many of the guns gang buy come from the streets you can usually buy a gun from the back of a truck for bout 50\$. Even old gangs are starting to be reorganized. Also with each type of gang comes with slang from the gang members countries such as "ehh vato u messin wid me esse dont u know im loco" . Alot of gang members are rich from selling drugs and things like that so u always see a big gangster driven a real nice car. They also have female gangs and they are just as visciuous as the guy gangs they do the exact same things. They have anarchist gangs who blow stuff up and destroy thing they have punk rocker gangs who are very weird. There are good gangs like just friends just chill together, and stuff.

There are many types of gangs but the dangerous ones are very bad because they are retaking the life of innocent kinds and fathers from the families and ripping families apart and causing disturbances.

Keep iT reaL.....PeacE =)
